RIGIBI

Overview

Rigibi is a puzzle game, where you mix colors in the right order to get the correct shade. All 99 handmade levels can be solved by both using visual senses and mathematically using HEX-codes for designers and programmers.

This game – a challenge for anyone who understands how the RGB color model works, as well as for those who wants to figure it out. Sometimes it's really hard to find, but most levels can be solved by 2-3 touches.

Available for iPhone, iPad and iPod touch with iOS 7.0 or later.
Price in App Store: **Free**.
Release date: May 25, 2015

Facts
